Date: 30 Oct 2021

Place: MAHIM, MUMBAI

DECLARATION

I declare that this written submission represents my ideas in my own words and where others'
Ideas or words have been included, I have adequately cited and referenced the original sources.

I also declare that I have adhered to all the principles of academic honesty and integrity and have
not misrepresented or fabricated or falsified any idea/data/fact/source in my submission.

I understand that any violation of the above will be cause for disciplinary action by the Institute and
can also evoke penal action from the sources which thus have not been properly cited or from
whom proper permission have not been taken when needed.

Acknowledgement

We would like to thank Fr. Dr. John Rose S.J (Director of XIE) for providing us with such an environment so as to achieve goals of our project and supporting us constantly.

We express our sincere gratitude to our Honorable Principal Mr. Y.D.Venkatesh for encouragement and facilities provided to us.

We would like to place on record our deep sense of gratitude to Prof.ChhayaNarvekar,Head of Dept Of Information Technology, Xavier Institute of Engineering, Mahim, Mumbai, for her generous guidance help and useful suggestions.

With deep sense of gratitude we acknowledge the guidance of our project guide Prof Martina D'souza. The time-to-time assistance and encouragement by her has played an important role in the development of our project.

We would also like to thank our entire Information Technology staff who have willingly cooperated with us in resolving our queries and providing us all the required facilities on time.

Term Work (25) = Miniproject(15) + Assignment(05) + Attendance(05)

Bloom's Taxonomy Level (BTL):

1: *Knowledge* **2:** *Understand* **3:** *Apply* **4:** *Analyse* **5:** *Evaluate* **6:** *Create*

Lab Outcome: Students will be able to :

1	Design a basic website using HTML5 and CSS3 to demonstrate responsive web design and implement dynamic web pages with validation using JavaScript objects by applying different event handling mechanism.	BTL: 6
2	Use AJAX Programming Technique to develop RIA	BTL: 3
3	Develop simple web application using server side PHP programming and Database Connectivity using MySQL.	BTL:6
4	Construct/Build well-formed XML Document and implement Web Service using Java.	BTL:6
5	Describe/Demonstrate simple web application using Python Django Framework.	BTL:1,2

1.Introduction

1.1 Need for developing the website.

As our economy grows, more and more people are moving to cities from villages and small towns. The direct result of urbanisation is the mushrooming of concrete jungle in cities. This leads to less and less space for greenery and planting, which results in city-dwellers losing contact with nature.

That's why people living in cities are inclined to develop mini gardens or planting areas according to the space available in their house or offices. Moreover, people are now more aware of the benefits of greenery around them, which is another reason for them to consider planting.

So, by the utmost love for nature and having enthusiasm for gardening, we are starting an **online plant nursery** and help others fulfill their desire to be near plants and nature all the time.

1.2 Problem Statement

Many people who wants to buy plants directly go to the nearby nursery and buy the plants. However the problem is that most of them have some information about popular plant items and same goes for the sellers which is not good for expansion of the nursery business.

Customer does not compare plant price with other shopkeepers at the same time .In nursery there is no facility for online payment only cash may be consumed .we cannot purchase plants through online mode. The number of nurseries is not growing nowadays which limits it's reach.

1.3 Aim and Objectives

- To provide plants in online way.
- To provide rare plants to plants lovers which are difficult to find in their surrounding.
- To expand the scope of plant nurseries by going online.
- To provide informations about plants in deep to the customers from beginning to end.
- To make people aware of plants other than ordinary ones.

1.4Scope

Neighborhood nurseries might not have every one of the plants that many patio nursery darlings might want to possess. We offer a wide assortment of plants, and they are promptly accessible. The online stage additionally offers a wide assortment of animal types, so you can discover various stores gaining practical experience in local plants, natural product trees and decorative trees. The online stage likewise allows you to look at costs from changed merchants. Toward the end, you can get your ideal items at a reasonable cost. Doorstep conveyance manages you the chance to arrange from the solace of your own home. The accommodation spares you the problem of powering your vehicle and heading to various stores to search for various plants.
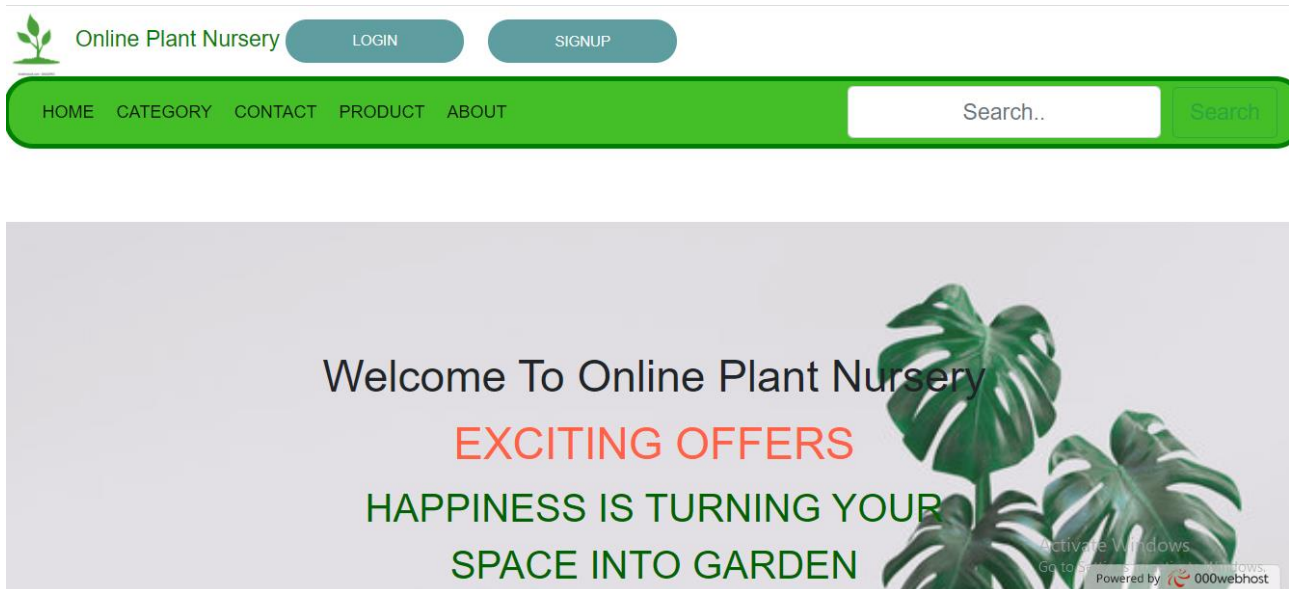

1.5Features

We will grow our own plants in a backyard nursery and also buy some plants wholesale for extra help. For shipping we will not only protect the plants from damage, but also keep them alive. Plants will be wrapped in a moist paper towel and then it will be wrapped by plastic and newspaper to keep them safe. Door to door service will be provided. Online Payment will also be accepted.

1.6 Constraints

- There will be no instant gratification because the item will be shipped to the customers.

- Shipping charges and delays can be common problems.

- There will be a delivery risk.

ABOUT OUR WEBSITE

Online Plant Nursery

The purpose of the project is to build an online plant nursey website to expand the reach of plant nurseries and provide plants to all with ease.

Scope Of Our Website

We offer a wide assortment of plants, and they are promptly accessible. The online stage additionally offers a wide assortment of animal types, so you can discover various stores gaining practical experience in local plants, natural product trees and decorative trees. The online stage likewise allows you to look at costs from changed merchants. Toward the end, you can get your ideal items at a reasonable cost. Doorstep conveyance manages you the chance to arrange from the solace of your own home. The accommodation spares you the problem of powering your vehicle and heading to various stores to search for various plants.

Read More

17. THIS IS ABOUT OUR WEBSITE

Product Function

The Online Nursery Management System provides online real time information about the plants available in the nursery, plants sold, sales records, barcode handling and also estimates the best sales and best customer, and also handles most accounting systems also for employees. The main purpose of this project is to reduce the manual work. This software is capable of managing Plant Sales Issues, Plant Availability, Calculating /Managing Plants Growth Stage and Generating Reports. In addition, it can generate the barcode for particular plant. The barcode generation module helps the nursery owners/managers to create bar codes for plants available in the nursery. The barcode generation module also provisions for printing and generating reports. The customer's status of buying is maintained in the nursery database. The customer's details can be fetched by the nursery owner/manager from the database as and when required.

Safety and Security Requirement

1. System will use secured database
2. Normal users can just read information but they cannot edit or modify anything except their personal and some other information.
3. System will have different types of users and every user has access constraints.
4. Proper user authentication should be provided.
